

SKY TAPE

Aluminium Foil Tape

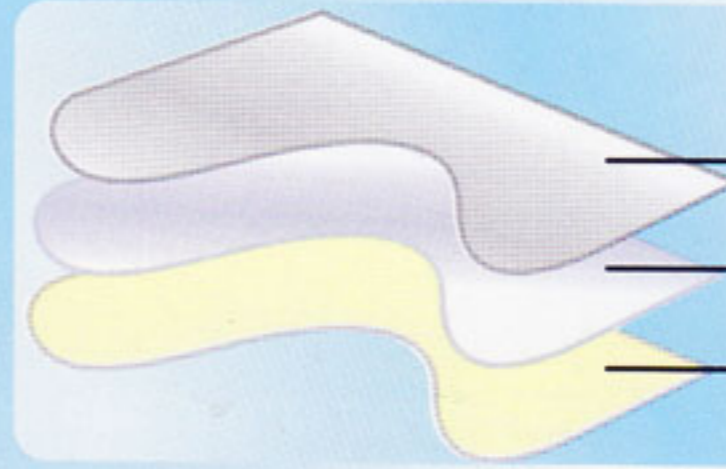

SKY COOL
Aluminium Foil Insulation

SKY TAPE is another kind of product having properties of insulation to produce as tape for joining the cut line or torn line and it is used for mending leak of material surface, for example, aluminium, zinc, plastic etc.

SKY TAPE is made from 100% pure aluminium foil, coating with special type adhesive having high strength when fixed with material surface and resistance to high heat temperature and coolness.

ALUMINIUM FOIL 100 %
ADHESIVE
LINER PAPER

TECHNICAL DATA

ALUMINIUM FOIL THICKNESS	30 MICRONS
COATING WEIGHT	30 G / M ²
ADHESIVE PEEL STRENGTH	0.2 KG / 25 MM
LENGHT	20 / 45 YARD

SIZE AND CARTON

SIZE		PACKING	CARTON SIZE
WIDTH (INC)	LENGTH (YARD)	ROLL / CARTON	(CM)
2	20	48	30 x 42 x 30
1	45	72	30 x 42 x 30
1 ^{1/2}	45	48	30 x 42 x 30
2	45	36	30 x 42 x 30
2 ^{1/2}	45	30	30 x 42 x 30
3	45	24	30 x 42 x 30

Standard and Quality

Aluminium Foil Tape passed the production process controlled by the company's engineers who specialize in specific engineering and the company uses modern and high quality technology, the company chooses raw materials for production and quality is assured by qualified QA. Products of the company are checked before introducing to the market, the quality can be certified for products distributed in the market.

Ways of use

1. Clean surface so that there is no dust, or there is no any material covering the surface while installation.
2. Patch Sky Tape to cover the torn line or any material that covering is needed tightly.
3. Press on or scrub on Sky Tape tightly all along the line of tape.
4. Use of Sky Tape, select Sky Tape according to the material surface which will be applied and perform according to the use as mentioned above.

The reason why you should use Sky Tape, 10 items

1. Sky Tape uses raw materials for production, that are genuine aluminium foil 100% of the whole roll.

2. Sky Tape can connect joint of the thermal reflective insulator "Sky Cool", "U Kool" or other brands of insulator.

3. Sky Tape can patch the torn line of insulator that close the surface with aluminium foil of all types.

4. Sky Tape can be put leak well on smooth and rough surface.

5. Sky Tape can endure heat and coolness well.

6. Sky Tape is made from strong and durable metal and adhesive tape has toughness and fixes well with every surface condition.

7. Sky Tape can be used well with every temperature and every climate.

8. Sky Tape can be used easily, conveniently and quickly.

9. Sky Tape does not spread fire as genuine aluminium foil 100% is a kind of metal, so it has properties that do not spread fire.

10. Sky Tape has long time service life.
